APPANION

(Junior/Senior) Business Intelligence Consultant (m/f/d)

Who we are:
At Appanion Labs, we create tangible added value from data. We help our customers to build new data-based business models and enable innovation in bridging the gap between IT, strategy and functional departments – all the way from developing a data strategy to realizing future-oriented solutions.

What we offer:
Become part of our ambitious startup in the beautiful city of Hamburg. Together, we want to realize own innovative ideas and solutions as a dynamic, growing and technology-enthusiastic team:

- Dynamic and inspiring working environment in the WeWork Hanse Forum
- Free choice of technical equipment (telephone, laptop)
- Personal event and training budget
- Straightforward decision processes and a lot of flexibility
- We support you to learn and develop new skills faster, according to your interests, then in any larger company.

Your Role:
- You support our customers in the areas of data architecture, business intelligence and company-wide reporting systems
- You develop data-based solutions and concepts and support in the implementation process on a project basis
- You can actively shape the direction of our business through participation in business development processes and strategic customer acquisition

Your Profile:
- You love data and enjoy making it available in the best possible way
- B.Sc. / M.Sc. in Business Informatics, Computer or Data Science, Mathematics
- Experience in the application or conception of BI solutions
  (Bonus: Experience working with cloud services such as MS Azure or AWS)
- Entrepreneurial spirit and customer-centric mindset
- Excellent communication skills in German and English
- Opportunity-driven, self-responsible work attitude and a good sense of humor

We are happy to receive your full application including your salary expectations at welcome@appanion.com!
