Cloud Backend Engineer (m/f/d)

We are looking for highly motivated people who want to make the supply chain and logistics sector more climate-friendly and data-oriented. Our goal is to develop innovative solutions for sustainable, digitalized transport chains and to support our customers in their transformation to data-driven organizations.

What we offer:

We want you to be part of our team! Together we want to actively shape progress and, realize our own innovative ideas and products in the future.

- Inspiring projects for more sustainable logistics
- Uncomplicated decision-making processes and great flexibility
- Free choice of technical equipment (telephone, laptop)
- Our ambition is that you learn new skills faster and develop them in a more focused way than elsewhere and use your energy for value-adding results.

Your role:

- You will design and oversee cloud-based data architectures, pipelines and efficient handling of large amounts of data.
- You will work closely with project/product management and data scientists to find strategically optimal solutions.
- You will structure and link data sources, think ahead and focus on quality and results.
- You will be responsible for the functionality and operations of IT systems from proof-of-concept to scalable in-production solutions.
- You have a sense for practicable solutions and fast development steps for the respective purpose.

Your profile:

- You have at least 2 years of experience as backend engineer or full-stack developer
- You are familiar with cloud architectures (Azure, AWS), DevOps, virtualization, version control, data provisioning and APIs
- You have practical experience in building backend environments and ideally worked with Node.js and Docker (nice-to-have: Kubernetes, Spark, Kafka)
- You are eager to develop yourself on a daily basis and enjoy working in a dynamic team with a high degree of creative freedom and to work for meaningful results.
- Bonus: Experience in working wit relational an NoSQL databases
- Excellent communication skills in German and English language
- Opportunity-driven, self-responsible work attitude and good sense of humor

We are happy to receive your full application including your salary expectations at welcome@appanion.com!
